

## SINGLE MAST NET CLIMBER INSTALLATION MANUAL

10 10

------

#### Safety Checklist after first assembly

- Test intervals of Safety: 6 months
- Test Component and contents:
- 1. Removing the reticulated system:
- Check of removing condition each rope
- Screwing the turn buckle and conversion the turnbuckle in anchors plate(see for this workstep turnbuckle assembly)
- 2. Abrasion condition of rope:
- Checking of all rope surface
- Strengthned of rope: Coating on the surface
- 3. Attachment condition of the anchors plate and turnbuckle
- 4. Screwing condition of all bolt
- 5. Galvanizing condition of the steel component:
- Protection of steel component from corrosion.

#### • Measure

In case of the appearance the defect detail is repaired usually within 3 days after checking.

# SINGLE MAST NET CLIMBER INSTALLATION & MAINTENANCE INSTRUCTIONS

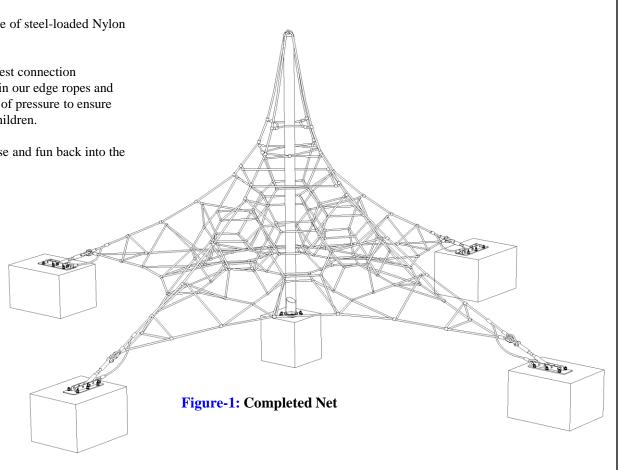

#### Features

This series is a pyramid-style climbing structure made of steel-loaded Nylon cables and comes protected against UV.

GS Web uses the highest steel content and the strongest connection materials in the industry, including a steel-wire core in our edge ropes and connection points crushed in place with over 75 tons of pressure to ensure long life of the games and maximum safety for the children.

GS Web Nets help bring movement, balance, exercise and fun back into the playground.

Ages: 6 to 12 years Capacity: 46 children Size: L: 32' 6'' / 9.9m W: 32' 6'' / 9.9m H: 18' 8'' / 5.7m Use zone: L: 42' 7'' / 12.97m W: 42' 7'' / 12.97m

1046-3, Najeon-ri, Saengnim-myeon Gimhae-city Gyeongsangnam province 621-821, Republic Of Korea Tel) 82+(0)55 326 9096~7 Fax) 82+(0)55 326 9022 E-mail) gswebinfo@chol.com Website) www.gsweb21.com

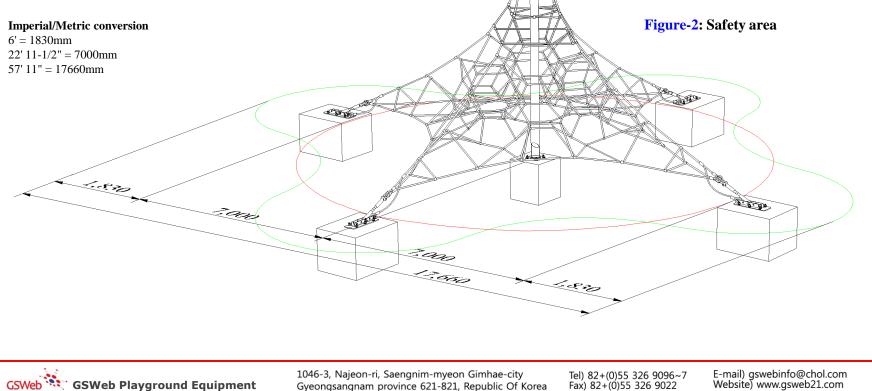

# SINGLE MAST NET CLIMBER Safety area and Fall Height zone

#### Safety area

The requirements for space and safety clearances are taken from BS-EN 1176-1/ ASTM-F1487/ CSA Z614 The use zone for stationary play equipment shall extend no less than 72 in.(1830mm) from all sides of the play structure.

#### Fall Height : 850mm (from surface)

The Fall height on the extennal surface of a pyramid shaped space net is the highest point attainable on the edge of the structure where an unimpeded fall to the protective surface is possible. This height is based on the centre of gravity height of the maximum user.

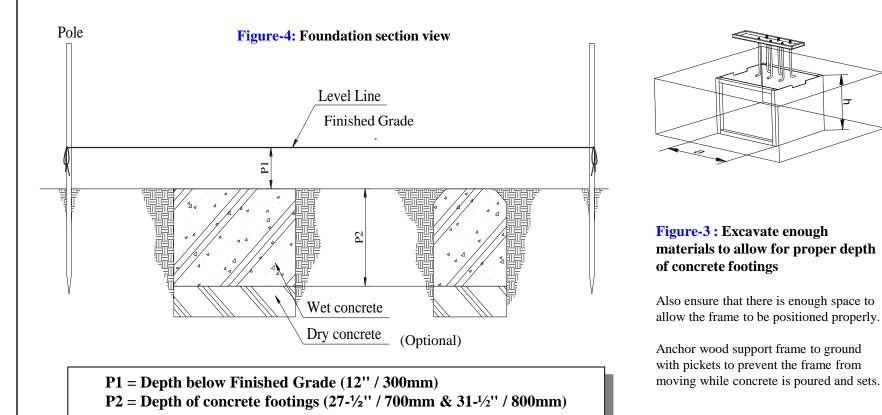

Gyeongsangnam province 621-821, Republic Of Korea

#### SINGLE MAST NET CLIMBER Concrete Foundation

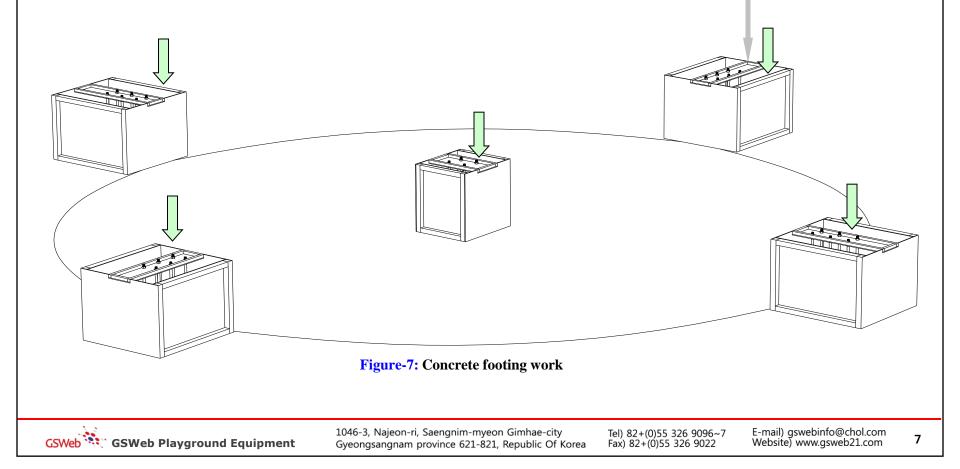

# SINGLE MAST NET CLIMBER Concrete Footing

#### [Concrete]

Pour concrete\* into wooden support frame until flush to top edge Allow 3-5 days for concrete to cure before proceeding to next step.

\*Concrete is to be wet concrete with minimum 25 MPA / 3500PSI.

[concrete footing work] Pour wet concrete in the wooden support frame

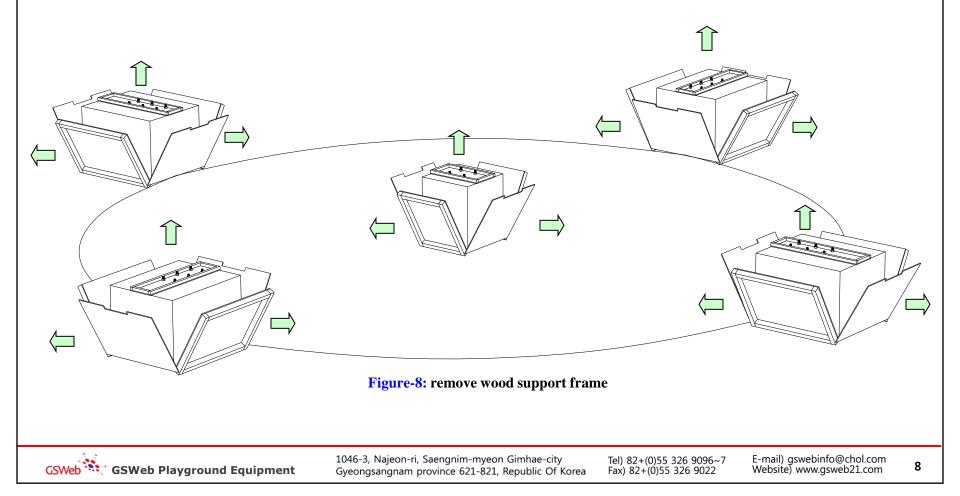

# SINGLE MAST NET CLIMBER Remove Wood Support Frame

#### Remove wood support frame from dry concrete blocks

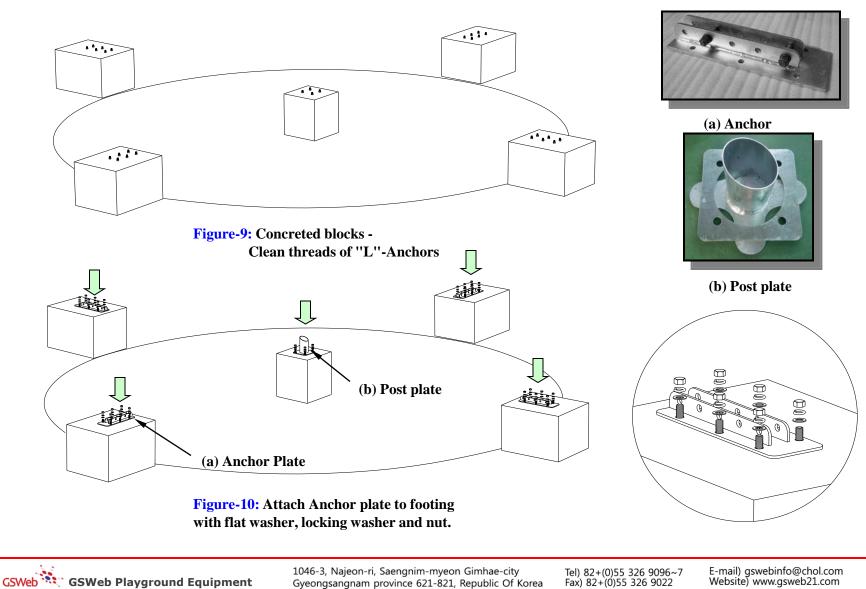

After concrete has cured enough, remove frames and replace soil around the footings to subgrade level

Maintenance

By Lappset Group Oy 200203, 220203

1046-3, Najeon-ri, Saengnim-myeon Gimhae-city Gyeongsangnam province 621-821, Republic Of Korea Tel) 82+(0)55 326 9096~7 Fax) 82+(0)55 326 9022 E-mail) gswebinfo@chol.com Website) www.gsweb21.com **18** 

#### Maintenance

#### A. General safety measures

On the playground there should be a sign(pictogram) giving the following information:

a) general emergency telephone number;

b) telephone number to contact maintenance personnel;

c) name of the playground;

d) address of playground; and

e) other relevant local information, if applicable.

The entry, exit and emergency paths to and from a playground, intended for use by the public and emergency services, should be accessible and free of obstacles at all times.

NOTE Attention is drawn to local regulations.

#### **B.** Procedures

Defects that occur during operation and which put safety at risk should be corrected without delay. If this is not possible, the equipment should be secured against use e.g. by immobilization or removal.

There should be written operational procedures covering the measures to be taken in the event of accidents, fire and the like.

Until unsafe equipment is repaired and released for use, access by the public should be prevented. Information about accidents brought to the attention of the manager should be recorded on a form that includes the following details:

a) date and tie of accident;

b) age and sex of victim and clothing worn, Including footwear;

c) equipment involved;

d) number of children on site at the time of the accident;

e) description of accident;

f) injury sustained including part(s) of body affected;

g) action taken;

h) witness statements;

i) any subsequent equipment modification;

j) weather conditions; and

k) any other relevant information.

GSWeb CSWeb Playground Equipment

#### C. Routine maintenance

To reduce accidents, the owner or operator should ensure that an appropriate routine maintenance schedule is established, implemented and maintained. This should take into account local conditions and the manufacturer's instructions that can affect the necessary inspection frequency. The schedule should list the components to be maintained and should also give procedures for dealing with complaints and breakdowns. The routine maintenance of playground equipment and surfaces should consist of preventative measures to maintain their level of safety, performance and compliance with the relevant part(s) of EN 1176. Such measures should include:

- a) tightening of fastenings;
- b) re-painting and re-treatment of surfaces;
- c) maintenance of any impact attenuating surfaces;
- d) lubrication of bearings;
- e) markig of equipment to signify loose fill finished surface level;
- f) cleaning;
- g) removal of broken glass and other debris or contaminants;
- h) restoring loose fills to the correct level; and
- i)maintenance of free space areas.

#### **D.** Corrective maintenance

Corrective maintenance should include measures to correct defects, or th re-establish the necessary levels of safety of the playground equipment and surfaces. Such measures should include:

- a) replacement of fastenings;
- b) welding of welding repairs;
- c) replacement of worn or defective parts; and
- d) replacement of defective structural components.

#### E. Personal safety

Repairs during operation that could put the safety of maintenance personnel of the public at risk, should be avoided.

#### F. Equipment alterations

Alterations to parts of a piece of equipment or structure that could affect the essential safety of the equipment should only be carried out after consultation with the manufacturer or a compete person.
